

Hossein Tavangar

Senior Frontend Developer

Tehran | +989134312831

androsein@yahoo.com

Frontend Team Lead with 7+ years of professional experience building responsive, scalable web applications using Vue.js, Nuxt.js and TypeScript. Proven ability to collaborate with cross-functional teams, mentor junior engineers, and deliver pixel-perfect user interfaces. Actively expanding expertise in React to broaden technology stack and future-proof solutions.

Skills

- Proficient in Vue.js
- Proficient in Nuxt.js
- React development
- Web performance optimization
- Responsive design
- PWA
- Bootstrap
- Tailwind
- Vuetify
- Vite
- Webpack
- Monorepo

Work Experience

Frontend Team Lead

MTYN Ltd.

January 2023 - present (3 yrs)

As Frontend Team Lead on the Baarbaanet project, I spearheaded the evolution of six core applications—including customer, driver, and curator web apps alongside shipper, carrier, and back-office panels—while managing the frontend team, conducting regular code reviews, and enforcing best practices for clean, maintainable code. I managed all six applications within an Nx-powered monorepo to share code, enforce consistency, and accelerate development. I designed and built a reusable UI-kit based on UI/UX guidelines to ensure a cohesive look and feel across every app. I implemented and integrated essential libraries for form handling, user authentication, authorization, and API services to optimize performance and future-proof our codebase. By leveraging Capacitor, I enabled the generation of Android APKs for rapid distribution of installable mobile applications. In close collaboration with product, design, and backend teams, I enhanced the user experience, streamlined workflows, and delivered high-quality, scalable solutions that supported seamless delivery and logistics operations.

Frontend Developer

MTYN Ltd.

January 2021 - January 2023 (1 yrs 8 mos)

As a Frontend Developer, I worked on enhancing the Baarbaanet platform, focusing on creating responsive and intuitive user interfaces for the web application, driver panel, courier panel, and admin panel. I collaborated closely with the backend team to ensure seamless integration and optimized performance, while also ensuring pixel-perfect designs. My contributions helped improve the overall user experience and streamline workflows, delivering high-quality solutions in a fast-paced development environment.

Full-Stack Web Developer

Self Employed

February 2020 - June 2021(1 yrs 5 mos)

As a Freelance Full-Stack Web Developer, I delivered end-to-end project implementations by leveraging PHP, Node.js, and Nest.js on the server side, paired with Vue.js or jQuery to craft responsive, interactive front-end interfaces. I owned the entire development lifecycle—from requirements gathering and architecture design through coding, testing, and deployment—ensuring clean, maintainable code and on-time delivery. Collaborating directly with clients, I translated business needs into tailored technical solutions, integrated third-party APIs, and optimized performance to exceed expectations on every engagement.

Frontend / Android Developer

XSyntax (team)

September 2015 - February 2020 (4 yrs 6 mos)

As a Developer, I began my professional career with this team by building Android applications using Java. Over time, driven by my growing interest in front-end development, I expanded my skills to include web technologies and contributed to the user interface side of projects. The team handled both personal and corporate client projects, where I collaborated closely with back-end and Windows developers to deliver robust, full-featured solutions tailored to client needs.

Education

Bachelor's Degree in Computer Software Technology/Technician

Islamic Azad University, Najafabad Branch

January 2018 - August 2022

Associate's Degree in Computer Software Engineering

Soroush Technical University, Isfahan

2015 - 2017

Languages

- English (Limited working proficiency)
- Persian (Native language)
